

About Us

Employer Centric True Third Party

We are not associated with any insurance carrier, agency or bank. The administration of self-funded health care plans is our core business. We see ourselves as an extension of the employer and work on their behalf.

Creative and Innovative Solutions

We do not believe one size fits all in health care, we can be creative in plan design, offer new products and services and the flexibility to create a plan that meets each employers needs.

Stop Loss Markets

We have a variety of markets to shop our clients stop loss coverage allowing us to compete very competitively.

Education

We believe the key to controlling health care costs is education of members. The health care market is complex. Our educated staff will spend time with members to assist in their understanding of how their plan works. Technology is great, but when someone needs to speak with a "live" person we will be here.

MAP Medical Advocate Program

To assist in the education of members we strongly encourage the use of MAP. This program involves and educates members about their health care choices with the goal of providing quality care while at the same time reducing claims.
